GIOVEGEN

PROTECT

30 Servings per container

5g Collagen per Serving

1 Consume 1 serving a day

A DAILY SHOT OF IMMUNITY

GIOVEGEN PROTECT IS A DIETARY SUPPLEMENT POWDER WITH DOUBLE HYDROLYZED COLLAGEN PEPTIDES ALONG WITH SEVERAL COMPONENTS TO FORTIFY THE GUT LINING, SUPERCHARGE ENERGY LEVELS, AND STRENGTHEN THE IMMUNE SYSTEM.

INGREDIENTS

Double Hydrolyzed Collagen: Giovegen Protect delivers a dose (5 grams) of Collagen Peptides. They've been shown to support collagen production. A boost in collagen may help increase our metabolism. Collagen is a complex protein and contains 19 different amino acids which include arginine, glutamine, glycine and proline. Glutamine is an amino-acid that is responsible for a healthy and strong immune system. It involves cellular repair and stimulation of immune cells that leads to speed up the healing process of an injury and infections.

Vitamin C: Vitamin C is absolutely essential for synthesis of collagen. May boost immunity by helping white blood cells function more effectively, strengthening your skin's defense system, and helping wounds heal faster.

Prebiotics: are types of fiber that feed the friendly bacteria in the digestive system. Which feeds the community of beneficial bacteria in your gut, and supports a rich and diverse gut microbiota good for your health.

Magnesium citrate (stabilized): Magnesium is vitally important for all cellular functions and processes. It helps maintain normal muscle and nerve function, keeps heart rhythm regular, supports a healthy immune system, and keeps joints and bones strong. Unlike other forms of magnesium (like commonly used magnesium oxide) magnesium citrate has a very good bioavailability and it's stabilized (a process to eliminate possible stomach upset).

Zinc Gluconate (stabilized): Zinc is an anti-inflammatory for our body and helps improve joint health by supporting the immune system and cartilage. Zinc gluconate is the most bioavailable form of zinc, and it's also stabilized to eliminate possible stomach upset effects.

Iron (Ferric Phosphate): Is an essential mineral that contributes to normal energy production, normal functioning of the immune system, and contributes to normal cognitive health. Iron contributes to the formation of red blood cells that help transport oxygen around the body and also assists with the reduction of tiredness and fatigue.

Vitamin D: plays a critical role in promoting immune response. It has both anti-inflammatory and immunoregulatory properties, and is crucial for the activation of immune system defenses. Is known to enhance the function of immune cells, including T cells and macrophages, that protect your body against pathogens A deficiency in this nutrient may compromise immune response and increase your risk of infection and disease.

HOW TO USE

Disolve one and half scoops (9.5g) of content into a full glass of water(200ml). Stir until full dissolution and drink completely..

FLAVOR: Orange
